

PRODUCT TYPE: OUTDOOR SHADE - BAMBOO REEDS

CARE AND MAINTENANCE

1. Gently bring down and raise bamboo panels.
Never drag as this will put weight and pressure on top mounting.
2. Raise panels during times of storms (signal number 3) or strong winds.
3. Bring down panels at the end of a heavy down pour to dry.
Accumulated moisture or water in the inner sides of the roll can weaken bamboo or weaving.
4. Remove obstructions such as- branches of trees, fallen leaves or other sharp objects near the panels. These may puncture bamboo panel or weaken the strands due to constant exposure.
5. Protect from molds and fungi by brushing up with Leadrite 25 Fungicide Wood Preservative or Woodtec 2.5 EC Insecticide Wood Preservative once or twice a year.

PAG-AALAGA

1. Dahan dahan ibaba at itaas ang bamboo panels.
Huwag i-bigla ang pag-akyat o ang pagbaba dahil mabibigatan ang pagkakasabit nito.
2. Itaas ang panels kapag may bagyo (signal number 3) o may malakas na hangin.
3. Ibaba ang panels pagkatapos ang malakas na pag-ulang para matuyo.
Ang tubig na naiipon sa loob ng panel ay makakapanghina ng bamboo panel o sa pagkaka-habi nito.
4. Tangalin ang malapit na mga nakatutusok na sanga ng puno o mga nahuhulog na dahon.
Ito ay maaring makabutas o makahina ng pabi ng panel kung lagi tumatama o nahuhulog sa panels.
5. Iwasan ang amag dala ng pagkakabasa.
Pahiran o i-brush ng Leadrite 25 Fungicide Wood Preservative o Woodtec 2.5 EC Insecticide isa o dalawang beses kada taon.
