To Whom It May Concern:

I am pleased to respond to your recent request regarding the LEED status of our product: Rakoll GXL 3.

Rakoll GXL 3 contains 4g/L (10 g/L less water and exempts) volatile organic content (VOC). Therefore, we believe these products meet the requirements of the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) Indoor Environmental Quality Credit 4.1 "Low Emitting Materials: Adhesives and Sealants" as a Multipurpose Construction Adhesive (VOC Limit: 70 g/L less water).

In addition, we do not use any urea-formaldehyde resins in the manufacturing of Rakoll GXL 3. Furthermore, we believe these products meet the LEED requirements for the Indoor Environmental Quality Credit 4.4 "Low Emitting Materials: Composite Wood & Agrifiber".

The following LEED credits may also apply to your building site:
MR Credit 4 - Recycled Content: 0%

I hope this information is helpful to you. If you have any questions or require additional information, please feel free to contact me at AP-Regulatory@hbfuller.com.

Sincerely,

H.B. Fuller Company
